## EXECUTIVE SUMMARY

Mr. Melvin F. Watson operated two landfill operations at this address, M & W #2 (L19708503) and M & W #3 (L19708506). These two sites are adjacent to each other. M & W #2 opened sometime prior to 1974 and was closed in July, 1976. M & W #3 was opened on September 11, 1974 and operated until December 31, 1979 at which time Mr. Watson lost his lease on the property. Before leaving the site Mr. Watson provided final cover but due to access restrictions was not able to complete seeding of final cover until May of 1982.

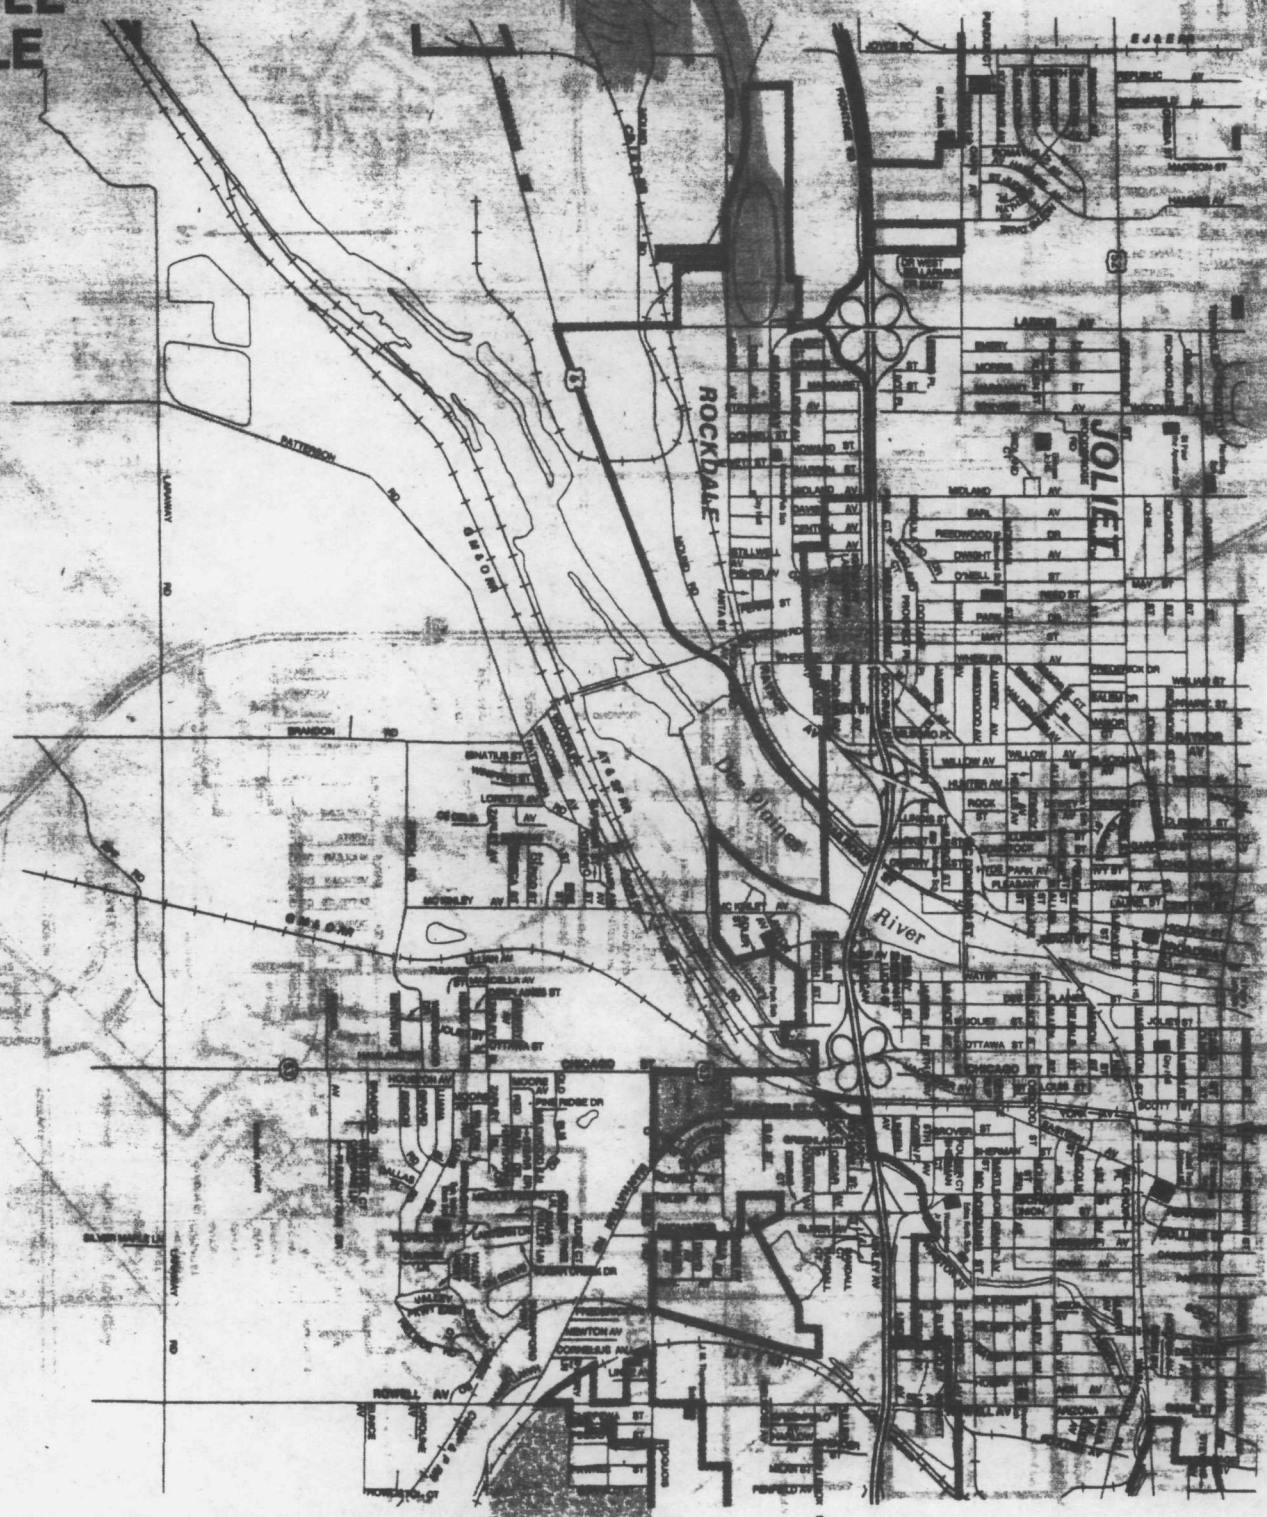

Ownership of both M & W #2 and M & W #3 is presently held by W. B. Persico, an asphalt paving company. Persico has been involved with several noted violations as to removing final cover and reopening M & W #2. Apparently Persico was using the previously closed M & W #2 as a repository for waste being generated at the paving plant.

After 1974 these landfills received general refuse and there are no locatable indications of hazardous waste. Prior to 1974 there is no record of what was placed in these landfills. The concern of this author arises from the lack of knowledge as to contents deposited prior to 1974, a lack of geological information, flow gradients of groundwater and the narrow test parameters used to evaluate samples taken from on site monitoring wells (test for Cl, Fe and ROE only).

A low priority has been assigned due to a lack of evidence indicating a problem actually exists. Some concern is warranted because of a lack of information and the large urban population dependent on groundwater as their only source of potable water.
